

Blinds by Peter Meyer

## Welcome

I am proud to bring you this new brochure showing my latest ranges including the launch of several exciting new products never before seen in Australia as well as some of my old favourites. Products such as XL50 pleat, Motoglide and the Exteriors by Peter Meyer range, are exclusive to Blinds by Peter Meyer.

Together with my wife Helen, we've built an Australian family business that's been both a pioneer and leader in the Window furnishings industry for over 30 years. We've been joined by our two sons, Simon & Damien who bring exceptional talent and industry expertise to strengthen our company. Their energy and drive have contributed much to many of the new developments and products shown in these pages.

Please revisit our online brochure as it will be regularly updated as I discover the latest products from around the world to bring to Australian architects, designers & decorators.

A stylized, handwritten signature in grey ink that reads 'Peter'.

## > Interior | Simply Ranges

Simply Roller, Simply Roman and Simply Natural are the names we use for the selection of our best fabrics. Presented in an easy to use sample set in the Signature Collection, we have embraced fabrics from around the world and condensed them into a "Signature Collection" that bears the Peter Meyer name.

We craft these fabrics into rollers, romans or panels of the highest quality on systems that provide ease of operations, visual simplicity and long service life.

Select a fabric and request a free cutting.

Select your blind style from the opposite page or visit our website at [petermeyerblinds.com.au](http://petermeyerblinds.com.au).

# Classic & timeless

## 1 Simply Roller

Style & elegance. Contemporary or classic.

# > Interior | Le Blinde

## **Styles:**

Romans, rollups, curtains and moving panels.

## **Weaves:**

13 Weaves in total.

5 Natural [ Beech ], 4 Mocha [ Mahog ],

4 Le Finishe [ 2 Le Washe + 1 Stain + 1 Paint colour ].

## **Finishes:**

Natural, clear lacquer, custom painted or stained.

## **Maximum Size:**

2500mm wide x 3000mm drop.

All prefinished fabrics have a maximum 2400mm width.

## **Thermal Properties:**

Timber is one of nature's best insulators.

UV protection will vary proportional to openness of weave as will insulation and light transmission.

## **Privacy:**

Four weaves are designed to give privacy.

All others give daytime privacy while allowing you to see out. This reverses at night.

## **Motorisation:**

Romans rollups and moving panels.

## **Warranty**

3 Years.

Choose weaves on page 22 or,  
visit our website at [www.petermeyerblinds.com.au](http://www.petermeyerblinds.com.au).

We offer a free sample service.

# Woven timbers

# > Interior | Chinois Eclectic

## Styles

Romans, rollups, curtains, and moving panels.

## Weaves:

11 exotic weaves selected for their individual charm.

## Finishes:

All natural finishes. Some can be clear lacquered or painted white. Painting as per woven timber surcharge.

## Maximum Size:

Most weaves are 2500mm wide.

Note: some larger weaves may be heavy.

## Thermal Properties:

Bamboo is one of nature's best insulators.

UV protection will vary proportional to openness of weave as will insulation and light transmission.

## Privacy:

None of the Chinois range will give sufficient privacy for a bedroom at night although they do provide daytime privacy.

## Motorisation:

Romans best suited.

## Warranty

3 Years.

Choose weaves on page 22 or,  
visit our website at [www.petermeyerblinds.com.au](http://www.petermeyerblinds.com.au).

# Interior | Shutters

Blinds by Peter Meyer offers an extensive range of Australian made Shutters to suit all applications, both domestic and commercial. We utilise only the highest quality materials and focus on the quality of fit and finish.

Our Ultimate Shutters are constructed from plantation grown, sustainable western red cedar. Cedar offers excellent insulation properties which will assist with keeping the heat transfer out during the summer months and retaining the warmth during the winter months.

Our Smart Plantation Shutters features a timber frame fitted with impact resistant blades which offers the benefits of Cedar for design and installation flexibility, and will keep looking good through the knocks and bumps of everyday life. It is the smart choice for high traffic areas like hallways, where blinds and shades are too vulnerable, as well as children's bedrooms and playrooms.

All of our interior shutters are available in your choice of hinged, bifold or sliding. As custom paint specialists, we are able to paint shutters to match any colour.

Combine our interior shutter range with our exterior aluminium shutter range, and Blinds By Peter Meyer has a shutter to suit every application.

Available in Sydney metropolitan area only.

Classic or modern. Natural or painted.

# > Interior | XL50 Pleat™

## Style

50mm dynamic pleats incorporating constant pleat system.

## Fabrics:

22 different patterns and colours.

2 can be used reversible.

4 available as roller blinds.

## Maximum Size:

Unique new 50mm pleated

# > Interior | Ballet Sheer

## **Ballet™ Performance Drapery Sheer**

Ballet™ Performance drapery sheers provide beauty and privacy without traditional vertical lines. Combines the luxury and beauty of curtains with the practicality of a blind operation.

The Ballet™ fabric has crisp, clean edges designed not to fray, so there are no visible hems anywhere on the shading. The continuous lengths of knit polyester fabric fold into generous translucent billows to create a stunning dimensional layer, while providing UV protection, light control and privacy.

### **Privacy:**

When looking directly at the shading in the closed position, the sheers provide perfect privacy with light filtering or blockout blades.

The sheers can be rotated left or right or fully retracted. The level of privacy can easily be adjusted by rotating the sheers to the desired angle of closure.

### **Motorisation:**

Cord only operation.

### **Maximum Size:**

Maximum width is 6000mm.

### **Warranty**

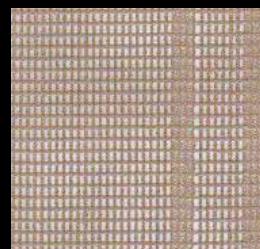

3 Years.

Elegant Knit Hazelnut

Falling Leaves Vellum

Linen Hazelnut

Wisteria Scroll Ivory

# Translucent Sheers

# > Interior | Shangri La

## **Styles:**

A translucent or opaque [ Moonlight ] fabric vane suspended between two layers of sheer fabric - offered in a range of 12 subtle colours [ 8 translucent + 4 room darkening ]

## **Operation:**

Smooth continuous chain operation allows the fabric vane to be angled open to filter light, tilted closed for privacy or rolled away into it's own neat headbox when not required.

## **Privacy:**

Closed vanes achieve total privacy.

## **Thermal Properties:**

UV blockage 99% when closed, approximately 80% when open.

## **Motorisation:**

Wireless lift and tilt only and fully integrated 240 volt.

## **Maximum Size:**

3000mm wide x 3350mm drop - Translucent.  
3000mm wide x 3000mm drop - Moonlight.

## **Warranty**

3 Years

# Translucent elegance

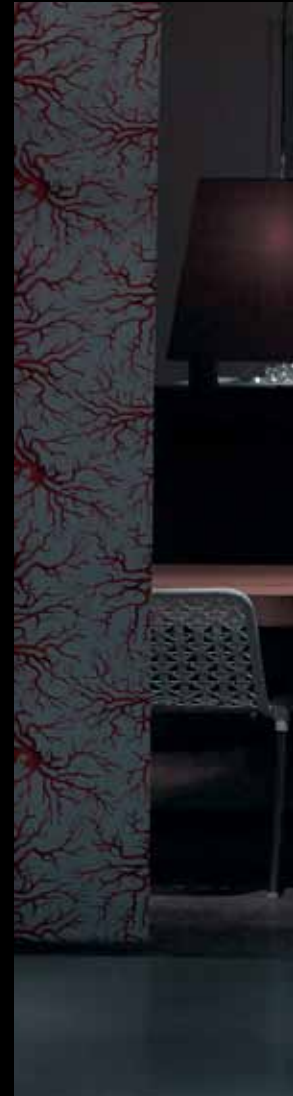

## > Interior | Moving Panels

Our new panel track is available in 3,4 and 5 channel systems with a choice of fabrics from The Signature Collection or Cachet ranges. The combinations are limitless with left stack, right stack or centre opening combinations and flick stick or cord draw options. you can also allow all panels to float and simply place them where you want them.

Our new Manuglide system incorporates a simple magnet to allow you to slide the back panel to get to the windows for easy cleaning. Suitable for large windows or doors, Manuglide takes panelblinds to a whole new level of operation. For Motoglide motorisation see next page.

# Woven & fabric panels

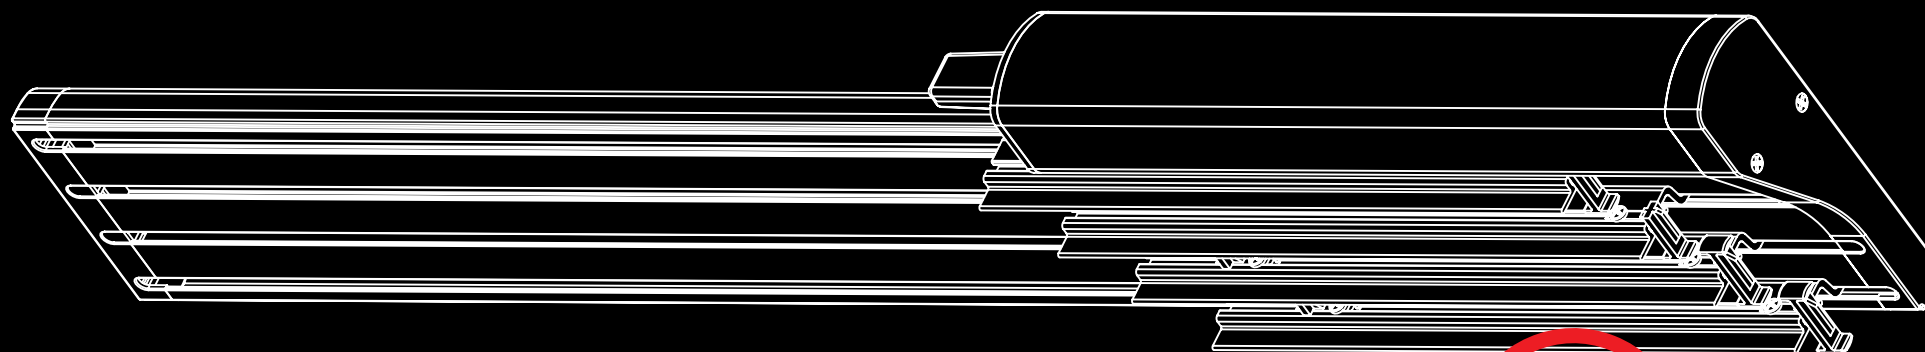

# > Interior | Motoglide™ Panel Track

Blinds by Peter Meyer offers the worlds first fully integrated motorised panel track system, Motoglide. Combining the look of panels in nearly any fabric with practicality of motorisation Motoglide will enhance your home or office with style and panache. Available in varying panel combinations the motoglide comes in 3, 4 and 5 panel tracks. Motoglide can be used to cover nearly all windows or even be used as a practical room divider.

A unique feature of the motoglide is the window cleaning function which allows the last panel to simply slide out of the way to clean the glass behind the last panel. Motoglide comes with a simple one touch remote controller. Also available as manual with flick stick or cord draw operation. See previous page for Manuglide.

# Unique new motorised track system

# Interior Motorisation | Somfy Specialists

## Our Interior motorisation

Blinds by Peter Meyer, at the forefront of motorisation for almost 20 years, has always worked closely with Somfy to bring you the most innovative motorised solutions from humble beginnings to the latest RTS options of today including Somfy's new silent motor range. Somfy has been producing internal blind motors at their facility in Cluses(France) since 1969 and has been in Australia since 1987 as a branch of Somfy international.

With Somfy's unique 5 year factory warranty, no other motor can offer you the peace of mind that Somfy can.

Blinds by Peter Meyer are happy to assist you with advice on your particular motorised application.

## We are Somfy Automation specialists

Purchasing from a Somfy Automation Specialist is your guarantee to receiving the highest possible level of customer service, giving you total peace of mind when purchasing a Somfy motorised product. Peter Meyer exclusively uses and recommends Somfy solutions.

## The highest quality components

Somfy motors and controllers undergo rigorous factory testing so you know that your Somfy motor will give you years of trouble free service.

All Somfy motors from Blinds by Peter Meyer are supplied with inline connectors for easy installation and wiring. Somfy motors will easily combine with your home automation system or can be controlled simply by dedicated Somfy remote controllers from 1 to 20 channels.

somfy®

**AUTOMATION  
SPECIALIST**

# Control light, shade & privacy with the finest

## The new Somfy i700 Touch Panel controller

This low cost and simple to use touch screen interface system brings home automation within reach of every homeowner.

The i700 Touch Panel package combines the open protocol Somfy RS485 RTS radio transmitter with the 7" thin film panel - allowing centralised control of Somfy automated blinds, awnings, curtains, louvres, shutters and lights. Simple to program timer functions and scenario settings are also possible via a single intuitive touch screen interface. For large projects, multiple panels can be individually accessed and share a single RS485 connection.

## Thermo Sunis Indoor WireFree™ Sun Sensor

The Thermo Sunis Indoor WireFree™ RTS is a wireless sunsensor that can automatically operate Somfy motorised window coverings, exterior screens and shutters according to the intensity of the sun possible via a single intuitive touch screen interface. For large projects, multiple panels can be individually accessed and share a single RS485 connection.

## Somfy Remote Controllers

Somfy supply a range of dedicated controllers to suit their motors from a single channel rts to a 20 channel to control every blind in the house. As Somfy automation specialists, we can advise you on the most suitable controller for your requirements.

# > Exteriors | Your Options

1

## Folding Arm Awnings

Our expert staff make your choice of a folding arm awning very simple. We ensure all your needs are fully assessed and use only the finest quality arms and fabrics. Your Peter Meyer folding arm awnings will be trouble free for many years.

2

## Exterior Metal Venetians

We recommend the Wareema External Venetian systems, known for their high quality and very advanced design. Blinds by Peter Meyer offers both domestic and commercial applications and can provide you with complete expert advice.

3

## Conservatories & Pergolas

Conservatory and Pergola covers are a speciality at Blinds by Peter Meyer Exteriors. These versatile shades can cover simple to difficult shapes and retract back into their stylish cassette.

4

## Skylight Systems

Usually internal, our skylight systems can be custom made for any application and motorised as required. We specialise in difficult applications, cassettes, siderails and tensioning for all of your skylight needs.

## 8 Exterior Motorisation

We recommend Somfy motors and controllers for our range of exterior products. With a motor for every application your exterior blinds will work effortlessly when they are motorised by Somfy.

[Somfy Exterior Motorisation](#)  
Full details - p 54

# > Exterior | Folding Arm Awnings

Australians take great delight in entertaining and relaxing outdoors. With the benefit of a retractable awning, you can create an outdoor room that protects against the sun or light rain as well as creating a cosy and private ambience.

Ideal for patios, verandahs, balconies and commercial applications such as restaurants, the retractable roof system creates a large pavilioned space free of structures and poles.

As a leading manufacturer of awnings, Aluxor is able to offer one of the largest folding arm awnings on the market, extending up to 21 metres wide and 4 metres projection. Aluxor manufactures five styles of folding arm awnings:

Discus (Full Cassette)

Olympian (Full Cassette)

Toga (Semi Cassette)

Stratos III (Semi Cassette)

Stratos I (Open Awning)

**ALUXOR** |||||

# Control the elements

## > Exterior | External Venetians

Blinds by Peter Meyer sells and recommends the Warema External Venetian Systems. Warema is well known for its high quality and advanced design and is the market leader in this elegant exterior window treatment. Blinds by Peter Meyer specialises in both domestic and commercial applications and can assist you with advice on Warema External Venetians.

Encompassing the latest European style and design, the Warema exterior aluminium venetian offers fantastic sun control as well as winter insulation. This product will dramatically assist you in cooling in summer but also keeping the warmth in during the cold winter months. This said, it will also help reduce your carbon footprint by reducing electricity consumption. Offered in a range of colours to suit all style of homes, the exterior aluminium venetian combines functionality with European style and design.

One of the key benefits of a Wareema Aluminium Venetian is that it can stop approximately 80% of the heat before it reaches your window.

# Elegant sun & privacy control

## > Exterior | Conservatories & Pergolas

Conservatory and pergola covers are a speciality at Blinds by Peter Meyer.

These versatile shades can cover large areas and retract back into their own stylish cassette. Ideally suited for covering exposed glass roofs and pergola structures. In combination with our Vertiscreen exterior rollers an open structure can be enclosed at the press of a button.

A large range of long lasting, high quality exterior fabrics are available for both horizontal and vertical applications.

A single Sundream Conservatory System can, with the use of intermediate rollers, bend around to cover two or more roof pitches or a roof and side with one piece of fabric.

## Versatile shade & weather control

## > Exterior | Skylight Blind Systems

Blinds by Peter Meyer can custom make skylight blinds systems for domestic or commercial applications.

Our skylight blind systems are designed to provide you with total sun control as well as assisting in insulating your building. We offer these systems in a range of options and the blinds can be made as a sun and light filter through to complete blackout.

Available in interior and exterior options, and your choice of manual or motorised operation.

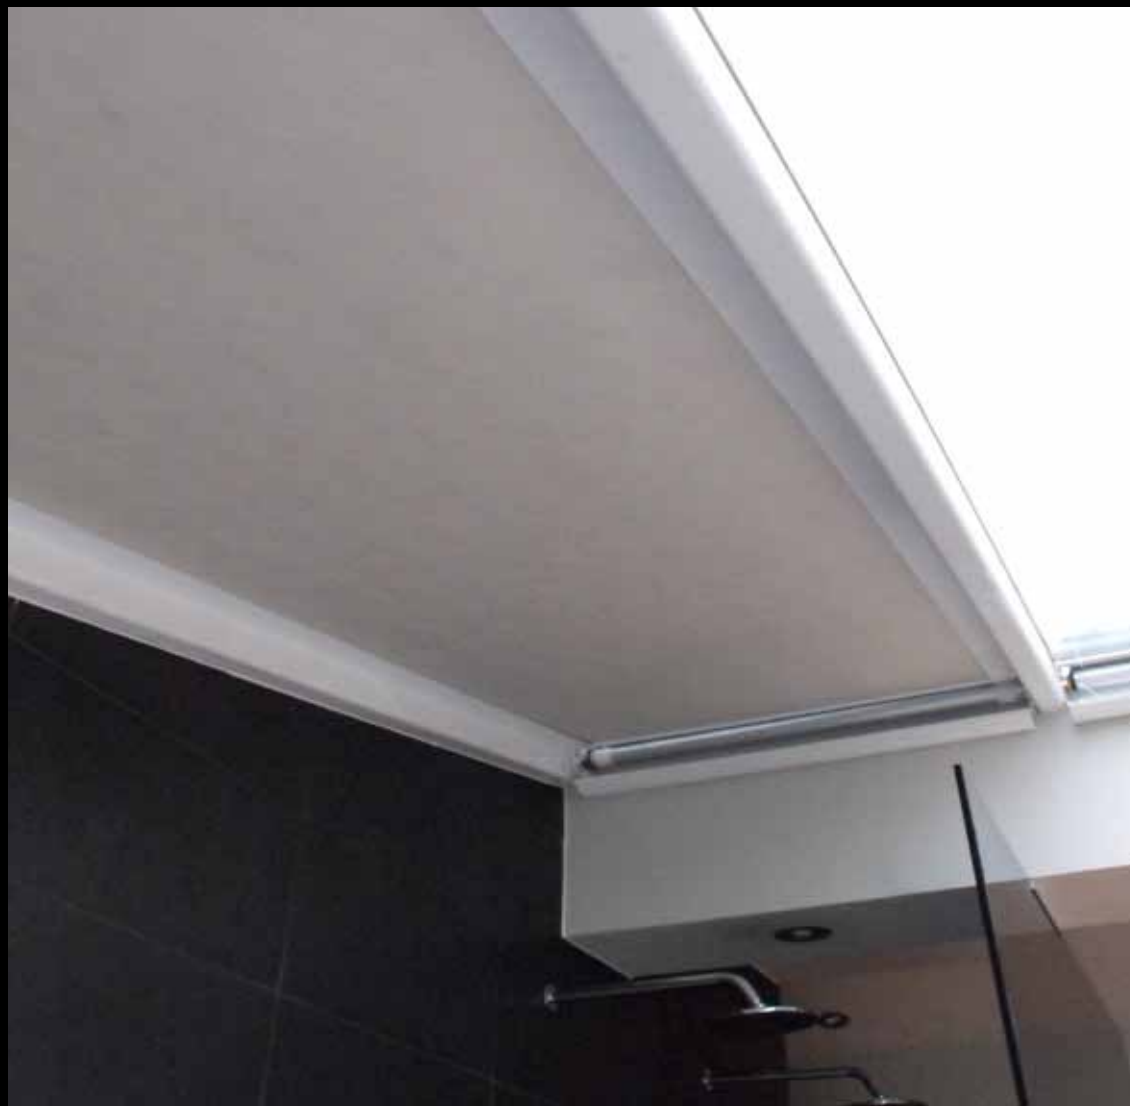

Our Diamond ESP fabric is most suitable for this application.

Our expert staff can advise you on the system most appropriate for your needs.

# Overhead glass sun & heat control

## > Exterior | Vertiscreen

Vertiscreen, for windows and doors, is an exterior vertical blind sunprotection system from Europe, with a modern slim-line look.

Easily and discreetly fitted to an existing home or commercial building, Vertiscreen can also be installed inside a reveal during construction, thus totally hiding the components from view.

Its compact profile includes a neat 95mm x 95mm aluminum head box, square bottom rail and side channels, which can be powdercoated to any colour required. An important contributor to Vertiscreen's energy efficient design is the narrow gap between glass and fabric, similar in principle to a roller shutter.

Depending on the fabric chosen, some of the benefits achieved with Vertiscreen will be improved insulation from heat gain and loss, UV shielding and reduction of glare. An opaque fabric can be used to create total blackout, while a screen fabric can offer sunprotection, without losing your view. We offer a very wide fabric choice.

All Peter Meyer Exterior products are offered in motorised or manual options.

# Sun & shade protection for doors & windows

## > Exterior | Straight Drop Awnings

The Straight Drop Awnings by Peter Meyer are designed for use on balconies, patios and awnings extending out from the building.

They offer sleek and functional shading and will suit both domestic home and commercial applications.

They are constructed from high quality aluminium and stainless steel components.

These awnings can cope with the tough Australian climate. You stop the heat penetrating the glass which in turn controls the temperature and keeps your building cool and comfortable, thus helping to reduce your heating/cooling costs.

Our wide variety of exterior fabric colours and styles will ensure that your exterior shading will compliment your building.

All Peter Meyer Exterior products are offered in motorised or manual options.

# Sun & shade protection for patios & balconies

## Exterior | Our Exterior Fabric Ranges

As with our exceptional interior fabric collection, Peter Meyer's wide range of high quality exterior fabric ranges is simply second to none, for either commercial or domestic applications.

All of our exterior systems, hardware and motorisation products have been carefully selected for their innovation, features, quality of the materials and precision manufacturing standards.

We naturally applied similar standards of excellence in our choice of the fabrics for our exterior range, to compliment the quality of the systems and hardware that they will be part of.

Through our international resources, we have brought together a collection of fabrics that will suit most requirements.

We offer ranges for both their functional and design qualities.

Fabrics are available to suit all situations that will solve the varied problems of sun, shade and privacy - for small to large budgets.

# Fabrics for every outdoor application

# External Motorisation | Somfy Specialists

## **Somfy. The world's leading motorisation specialists.**

Blinds by Peter Meyer use and recommend Somfy motors for their external product range. We are an accredited Somfy Automation Specialist.

Having your exterior blinds automated also gives you the functionality of sun and wind control. The motors can be varied to suit single operation or commercial or domestic automation systems as required.

All Somfy equipment comes with a 5 year warranty, this combined with the quality of the componentry and workmanship that Blinds By Peter Meyer offers means you get a high quality long lasting product that will be tailored to your requirements.
